From Reports to Real Time Insights:
The AI Powered Intelligence Platform
That Thinks Ahead

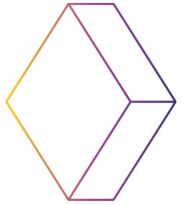

Korcomptenz

Total Technology Transformation

The Moment of Truth for Modern Banking

Banks today are defined not by how much data they own, but by how fast they can use it.

Yet many institutions remain trapped in yesterday's operating model — with disconnected systems, delayed reporting, and heavy IT dependencies that slow decisions.

Executives see the problem clearly:

We're data-rich but insight-poor.

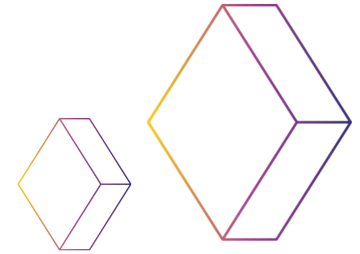

Altiaris™ by Korcomptenz was built for this moment.

Powered by Microsoft Fabric and AI, it delivers unified, predictive intelligence that helps BFSI leaders spot risk sooner, act faster, and personalize at scale — all without waiting overnight for a report to refresh.

Meet Altiaris™:

Banking Intelligence, Ready on Day One

Altiaris is a ready-to-deploy AI analytics accelerator built for banks and financial institutions that want measurable impact — not multi-year integration projects.

What It Delivers

- **360° customer view:** Unifies data across Core, CRM, and LOS systems
- **AI intelligence layer:** Predicts churn, fraud, and cross-sell potential
- **Copilot-powered analytics:** Ask questions in plain English, act instantly
- **Role-based dashboards:** CXO, Branch, Risk, and Ops teams see what matters most
- **Faster value:** Deployed in weeks using pre-built financial data models

Altiaris turns data into insight and insight into results at the speed modern banking demands.

The End of Legacy Limits:

From Lag to Leadership

Traditional Reporting	With Altiaris™
Fragmented data across systems	Unified Customer 360 with real-time behavioral insights
Reports delayed for days	Live dashboards + predictive alerts within minutes
Heavy IT reliance	Self-service analytics powered by Copilot
Fraud identified post-incident	AI-driven anomaly and fraud pattern detection
Generic campaigns	Hyper-personalized insights for smarter targeting
Disconnected KPIs	Unified, role-based dashboards for all leadership levels

Altiaris replaces lag with leadership.

By integrating data, intelligence, and execution into one system of truth, it empowers decision-makers to deliver results before competitors even react.

AI Dashboards That Drive Every Line of Business

1 Customer Retention and Churn Prevention

Detect early warning signs by analyzing behavior, frequency, and service patterns. Act on churn triggers before they become attrition.

2 Branch Performance Optimization

Compare footfall, conversion, and cost across regions. Identify efficiency gaps and make data-driven resource decisions.

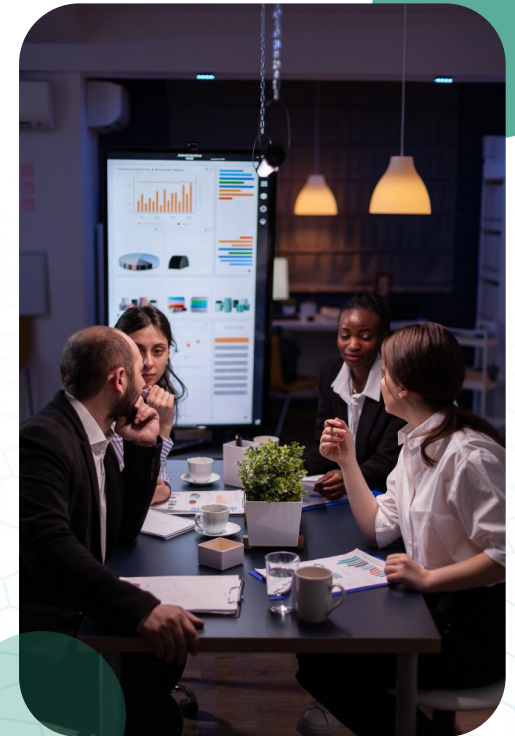

3 Employee Productivity Insights

Track turnaround time, conversion ratios, and customer satisfaction. Use insights to improve performance at every level.

4 Customer Experience and Loyalty

Combine satisfaction data and engagement signals to personalize products and deepen relationships.

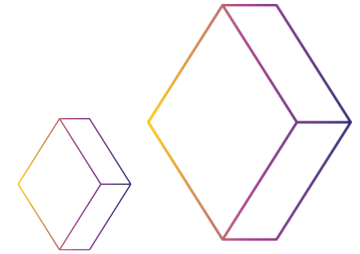

Altiares isn't just analytics — it's operational intelligence you can act on in real time.

Inside the Engine:

How Microsoft Fabric Powers Altiaris

Altiaris is built on Microsoft Fabric, a unified data and AI platform that eliminates silos and accelerates business insight.

Microsoft Fabric

Key Layers of the Architecture

Data Fabric: Brings together Core, CRM, ERP, and LOS data under one governed structure

AI & Machine Learning Models: Detect patterns, predict behavior, and recommend actions

Governance and Security: Metadata management, lineage tracking, and compliance controls

Copilot + Natural Language Queries: Allow users to ask “What’s driving churn?” and see instant answers

Power BI Integration: Role-based dashboards built directly on the Fabric semantic layer

The Result: Scalable, intelligent, and compliant banking analytics that grow with your institution.

The Business Impact:

Measurable. Immediate. Proven.

Metric	Before Altiaris™	With Altiaris™
Report refresh time	8+ hours	Under 10 minutes
Cross-sell campaign ROI	Baseline	+40% response lift
Churn prediction accuracy	Low	85%+ precision
IT dependency	High	Reduced by 70%
Fraud detection	Post-incident	Real-time, proactive alerts

Altiaris helps financial institutions accelerate time-to-insight, increase profitability, and strengthen trust — turning every decision into measurable value.

The Korcomptenz Advantage:

Trusted Transformation Partners

Korcomptenz brings 20+ years of BFSI transformation experience, uniting technology depth and domain specialization to make banking intelligence measurable and human-centered.

Recognized by Industry Analysts

Forrester Recognition (2025): Named in The Microsoft Business Applications Services Landscape, Q3 2025.

ISG Recognition: Identified as a Contender in AI Services for Microsoft Cloud and Data Fabric on Azure — validating our engineering excellence and innovation leadership.

Our Differentiators

Deep BFSI expertise — from retail lending to risk and compliance

Proven frameworks for measurable value (BVR, MVD)

Hybrid delivery model for agility and control

With Korcomptenz, banks move from “analytics in theory” to AI that performs — securely, transparently, and at speed.

From Data to Measurable Decisions:

Your Next Step

The future of banking belongs to institutions that don't just measure performance — they anticipate it.

Altiaris™ helps you:

- Predict risk before it impacts your balance sheet
- Empower teams with self-service AI
- Personalize experiences that drive retention and growth
- Build a governed foundation for scalable innovation

Let's redefine what your data can do.
