

# Sage & Dynamics 365 Finance & Supply Chain: side-by-side comparison (migration benefits)

Dimension	Sage today (typically Sage X3 and/ or Sage Intacct)	Dynamics 365 Finance & Supply Chain Management (what you gain)
<b>Best-fit intent</b>	<p><b>X3:</b> “From finance to supply chain and production management” for mid-market ERP needs.</p> <p><b>Intacct:</b> finance-led cloud financial management (often for multi-entity orgs).</p>	<p><b>Enterprise-grade ERP</b> for scaling global finance and end-to-end supply chain execution on one Microsoft platform. Finance helps monitor global operations “in real time” and predict outcomes.</p>
<b>Operational scope</b>	<p><b>X3:</b> finance + supply chain + production management positioning.</p> <p><b>Intacct:</b> core financials with multi-entity focus.</p>	<p><b>Supply Chain Management:</b> explicitly covers supply chain planning, procurement, manufacturing/shop floor, order management/pricing, warehouse management/fulfillment, and asset management/maintenance.</p>
<b>Visibility &amp; decision support</b>	<p>Capabilities vary by Sage product; often depends on reporting configuration and connected tools. (X3 vs Intacct differs materially).</p>	<p>Microsoft positions D365 Finance for real-time monitoring + data-driven decisions, and D365 SCM for real-time visibility and advanced insights.</p>
<b>Supply chain depth</b>	<p>X3 supports supply chain + production management; depth depends on modules/implementation.</p>	<p>D365 SCM capability map is clearly defined end-to-end (planning → procurement → manufacturing → warehousing → fulfillment → asset mgmt).</p>
<b>Roadmap transparency</b>	<p>Sage roadmap visibility typically depends on product line and customer program/region.</p>	<p>Microsoft publishes <b>release wave plans</b> and maintains a comprehensive product documentation hub—useful for buyers who want predictable innovation.</p>
<b>Migration driver (the simple story)</b>	<p>Great for mid-market ERP/finance, but many orgs hit limits when they need stronger global standardization and end-to-end supply chain orchestration.</p>	<p>Move to D365 F&amp;O to unify finance + supply chain, improve visibility, and scale with an enterprise platform backed by Microsoft’s update cadence and docs.</p>

If you’re outgrowing Sage (X3 or Intacct) and need a more standardized, end-to-end operating model, **Dynamics 365 Finance + Supply Chain Management** brings **real-time global finance visibility** and a clearly defined supply chain suite spanning **planning, procurement, manufacturing, warehousing, fulfillment, and asset maintenance**.
